

## The Greater Community Project

### Health Improvement through The Latrine Utilization

O primary school which comprises 314 students (174 girls) and 7 teachers (4 women) located in O village, Boeung Bot Kandaol commune, Bakan district, Pursat province. As poor hygiene practices of students in school resulted from not enough latrines, the school's principal Mr. Thorn Pov requested a project for a latrine. By careful consideration, the project provided a three-room latrine to the school on December 25,

2022.

After the latrine construction, hygiene practices have improved. Students regularly washed their hands with soap before eating and after utilizing the latrine. In addition, teachers have shared hygiene and sanitation practical advice with students to ensure they improved hygiene practices at school and their home. Teachers and all students would like to express gratitude thank the ACR for providing a latrine through the FLD. We really appreciate and will maintain the provided latrine for long-term utilization.
